East Woodhay Parish Council

Spring Update

The major part of our discretionary spend is maintaining the equipment in our recreation grounds and the playground at Woolton Hill. We have mentioned before that this is highly used by the community but it's aging and so making sure preventative measures are taken is important to ensure its life can be extended for as long as possible. Replacing this equipment comes at a high cost.

Consequently, as part of this maintenance we undertook a significant cleaning exercise to remove moss, fungi etc which would cause wood to start decaying.

Above left is Josh, from our maintenance company Scofell, undertaking the work and on the right is how the climbing frame looked after cleaning.

Additionally as part of the maintenance agreement we have with Scofell the tennis court is sprayed and the new boardwalk cleared of leaves.

We've had some people ask about how the elm trees and new hedging is doing in the parish field as it was so wet when it was planted on our community afternoon with Woolton Hill School eco team.

We are pleased to report that all are looking healthy and new growth is looking good.
